Long Term Care Industry

MED-CALC

CMS APPROVED
COST REPORT
SOFTWARE

Overview

EASY TO USE:

Med-Calc software is Excel based, making it simple and easy to use.

CUSTOMER SUPPORT:

At Progressive Provider Services we pride ourselves with our customer support. Personalized attention is given to all inquiries. We go the extra mile to ensure your software questions are handled with clarity and in a timely fashion.

TRIAL BALANCE DOWNLOADING:

Trial balance can easily be imported into the Med-Calc software. A user can place the accounts into the software and assign codes to each item and the account totals automatically transfer to the appropriate cost report worksheets.

BUILT-IN ERROR CHECKING:

The software will automatically provide the user with all known calculation errors. Med-Calc software also offers additional warnings that check for inconsistencies to assist with cost report accuracy.

ALL-IN-ONE:

Space for notes and work paper calculations are included on the Med-Calc spreadsheet. This allows all information and computations to be kept together in one file.

IMPORT COST REPORT:

Med-Calc software allows the user to take a cost report generated anywhere and import its ECR

CALCULATE MEDICARE RATES:

Included is a worksheet that calculates the rates for each RUG category for SNF Cost Reports.

MANAGEMENT REPORTS:

Various management reports are available for the analysis of current year data.

LOOK AND FEEL:

Worksheets are attractively presented both on the screen and in print.

PRINTING:

A variety of automated printing options allow for easy packaging of reports.
